Education

Lebanese University – Faculty of Science

Bachelor of Computer Science

Nabatieh, Lebanon

June 2024

Experience

Ecrio INC.

Cupertino, California (Remote)

Software Engineer March 2024 - Present

- Develop text classification models to analyze and categorize textual data
- Build and fine-tune object detection models using the YOLO framework
- Build and implement face recognition systems using ArcFace
- Work with ASR models like wav2vec2 and Whisper to transcribe audio and classify the transcriptions using a text classification model
- Improve AI models performance through quantization using OpenVINO
- Develop a chatbot using OpenAI Assistant API and connect it to a web interface using Flask
- Assist interns with tasks in AI and Machine Learning
- Write comprehensive unit tests and ensure high code coverage across all modules to maintain code quality and reliability.

Coding Instructor February 2024 – August 2024

Beirut, Lebanon (Remote)

- Teach students Python programming
- Teach how to create mobile apps using Thunkable
- Teach children the fundamentals of coding using Scratch

Skills & Interests

Technical

- **Programming Languages:** Java, JavaScript, and Python.
- **Frameworks:** React.js, Express.js, and Node.js
- **Databases:** MySQL, MongoDB, and Firebase Realtime Database

Language: Fluent in English and Arabic

Personal Projects

Food Delivery Web Application

- Built a complete web application of food delivery using React JS, Node JS, Express, MongoDB for the database, and Stripe for the payment process.
- Designed a responsive frontend using React that includes displaying food items, shopping carts, and user authentication.
- Used Node and Express for user registration, login, order management, and storage on MongoDB to handle the back-end part.
- Integrated the Stripe API to enable easy and secure payment processes for better user experience.
- Admin dashboard to add food items, track orders, and update the status in real time.

Dom Tac Music Instruments Shop

- Designed and deployed a music instrument shop website using the MERN stack.
- Enabled users to browse, filter, and sort music instruments by categories.
- Simplified the ordering process by integrating WhatsApp for direct communication and order placement, without requiring user login.
- Built an admin panel to manage inventory: adding, updating, and deleting products as needed.
- Developed RESTful APIs using Node.js and Express.js to handle product data stored in a MongoDB database.
- Ensured a responsive and user-friendly UI for seamless browsing across devices.
- Deployed the project online on Vercel for public access.

Full Stack Clothing Website

- Created and deployed a full-stack eCommerce website using the MERN stack.
- Added user features: browse, filter, sort products, and add items to the cart with size options.
- Integrated payment methods: included Stripe, and Cash on Delivery for customer payments.
- Enabled order placement: users could enter a delivery address and complete purchases easily.
- Built an admin panel: allowed admins to add, delete, and manage products in the store.
- Developed APIs using Node.js and Express.js to handle data in a MongoDB database.
- Deployed the project online on Vercel for public access.

Certifications

Complete Web and Mobile designer in 2023: UI/UX, Figma + more
